XCMP

Cross chain message protocol

More info:
https://research.web3.foundation/en/latest/polkadot/XCMP/index.html

XCMP

guaranteed message delivery

a receiving chain will receive the message as long as it keeps producing blocks.

More info:
https://research.web3.foundation/en/latest/polkadot/XCMP/index.html

XCMP

trustless delivery

Polkadot’s shared security ensures the correctness of message delivery and authenticity as long as we trust the code that produces and consumes them.

More info:
https://research.web3.foundation/en/latest/polkadot/XCMP/index.html

XCMP

ordered delivery

messages arrive in a well-defined order.

More info:
https://research.web3.foundation/en/latest/polkadot/XCMP/index.html

POLKADOT DECODED
June 29th-30th, 2022

We are in! :)
